FOR IMMEDIATE RELEASE

AERC.com, Inc. and E-World Recyclers LLC Sign National Partnering Agreement

Flanders, NJ – April 28, 2008 – AERC.com, Inc., one of the nation’s leading full-service Secure Data Management and recycling company, signed a national partnership agreement today with E-World Recyclers LLC. This agreement provides that AERC will service several national E-World clients. AERC’s national footprint coupled with over 30 years of experience in the industry are key in servicing clients’ needs and satisfying all applicable legal requirements and compliance issues.

In addition, AERC has agreed to purchase a series of the patented glass hot wire separators from E-World Recyclers. Utilizing this technology will give AERC and Com-Cycle the capability for segregating clean streams of Cathode Ray Tube (CRT) glass while employing a revolutionary new separation process. This is a method that enables a clean detachment of the hazardous lead bearing funnel glass from the non-hazardous panel while safely recycling CRT tubes, providing clean streams of marketable reusable glass.

As pioneers in the CRT recycling industry, E-World Recyclers is again breaking new ground by providing its clients with the most environmentally conscientious and innovative solution for the safe and effective recycling of CRT glass waste. Transparent recycling procedures are crucial in order to provide optimal customer service for clients. As part of E-World’s continuous improvement business model, the Company utilizes the newest technology to provide safe and environmentally friendly recycling solutions as a part of a complete solution for its customers.

Bob Erie, founder and co-owner of E-World Recyclers states, “The AERC – E-World partnership is a perfect example of our desire to truly do what is best for the environment. By utilizing E-World’s wire separation technology, AERC will be the first company on the east coast capable of creating value in a traditionally valueless product like CRT glass. Regionalizing the logistical challenges allows us to combine our core business strengths, while reducing transportation costs, fuel consumption, and carbon emissions.”

“This mutually beneficial relationship will help E-World Recyclers service its customers while giving AERC the opportunity to reinforce its national presence in multiple industries where data security and environmental responsibility are a priority. AERC’s state of the art technology in tandem with its turnkey solution customized to the individualistic needs of clients provides for an unsurpassed customer experience. The Company is eager to begin servicing these clients on a national level and is hopeful that this is the start of an ongoing working relationship with E-World Recyclers,” says Lindsay Landmesser, VP of Sales of AERC Recycling Solutions.

About AERC Recycling Solutions and Com-Cycle

AERC Recycling Solutions has become an industry leader through its partnerships with clients by providing unmatched convenience, regulatory compliance and expert consulting to handle Universal Waste issues. Com-Cycle was started in 2001 by AERC to help service customers with electronics recycling needs. Com-Cycle offers complete computer and electronics recycling services with a Zero-Waste-to-Landfill

*Solutions for Secure Data Management
& End of Life Electronics*

Policy. AERC / Com-Cycle offer compliance with Federal, State, and Local regulations as well as Secure Data Destruction for your electronic data drives. Com-Cycle provides an array of services including Secure Data Destruction and Management, Total Asset Management, and End-of-Life Electronics Management. With its own fleet of GPS tracked trucks, AERC / Com-Cycle provide delivery confirmations and in-house management of logistics for clients and can provide an audit trail for compliance with data security and environmental laws.

The Company provides “chain of custody” of assets for clients with coverage throughout all major markets in the United States, with plans to open three new facilities strategically located across the United States within the next twelve months. AERC has secured funding and is looking for acquisitions, business combinations, and joint ventures in its respective market, in particular companies that possess strong management with industry knowledge, experience, and the ability to experience financial growth through beneficial operating leverage. Interested companies should contact Peter J. Jegou at pjegou@aercrecycling.com. Please visit www.com-cycle.com for more information.

About E-World Recyclers

"E-World Recyclers is dedicated to the proper disposal of all types of electronic waste," said Bob Erie, CEO and co-founder of E-World Recyclers LLC. "Our vision is to be the leader within the electronic recycling industry, promoting and maintaining the highest level of environmental integrity and product stewardship."

E-World Recyclers operates a 46,000 sq. ft. facility in San Diego's North County region. The facility specializes in the environmentally safe recycling of thousands of tons of electronic waste each year, by utilizing proprietary separating equipment designed to make clean streams of raw materials. Electronic waste contains large quantities of glass, plastic, copper, steel and aluminum, all of which can be reused in the manufacturing of new products. Recycling electronic waste is not only good for the environment but spares natural resources and conserves energy. E-World Recyclers has diverted millions of pounds of hazardous materials from California landfills, created numerous San Diego based employment opportunities, and is a true benefit to the San Diego community.
