FOR IMMEDIATE RELEASE

AERC/ Com-Cycle Announces Patent Pending S.C.O.P.E Device for Onsite Hard Drive Destruction

Flanders, NJ -- Oct. 22, 2007 -- The Self Contained Optical Platter Eliminator (SCOPE) allows AERC/Com-Cycle to service the onsite data destruction needs of clients. This device eliminates any liability of sending information containing devices off site for total physical destruction. The SCOPE uses 3 tons of force to destroy the information containing hard drive platters.

This portable device is small enough to travel with and can be easily moved through offices even during business hours. Our trained technician will ensure that there is little to no business interruption. The SCOPE, coupled with Linea products, registers serial numbers as well as a time stamp of the destruction by integrating mobile scanning technology. This allows the client to have instant access to a list of serial numbers for the destroyed drives.

About AERC/Com-Cycle:

AERC Recycling Solutions and its wholly owned subsidiary Com-Cycle has experience in fulfilling the unique security requirements of target industries including healthcare, education, banking and financial services. AERC's chain-of-custody is an important part of auditing for compliance with data security and environmental laws.

Under our "Reuse, Refurbish and Recycle" directive, Com-Cycle de-manufactures and disassembles electronic equipment, harvests usable components, manages hazardous components and erases and destroys hard drives in accordance with the DOD approved program.

Our secure GPS outfitted fleet of vehicles allow for delivery confirmation and in-house management of logistics for our clients will provide an audit trail for compliance with data security and environmental laws. We provide competitive secure transportation of assets for clients with coverage throughout all major markets in the United States, with plans to open three new facilities strategically located across the United States within the next twelve months.

The Company currently has eight regional facilities nationwide and engineering and administrative facilities in Flanders, NJ.
